## Policy Document on the Green Campus

**Green Campus:** A Green Campus is a place where environmentally friendly practices and education combine to promote sustainable and eco-friendly practices in the campus. The green campus concept offers an institution the opportunity to take the lead in redefining its environmental culture and developing new paradigms by creating sustainable solutions to environmental, social and economic needs of mankind.

**Objectives of the Go Green Campus:** The first step of the Go Green Campus involves establishing a POLICY DOCUMENT spelling out the strategies, plans and other allied tasks to make this Program functional officially.

We believe that greening the campus is all about sweeping away wasteful inefficiencies and using conventional sources of energies for its daily power needs, correct disposal handling, purchase of environment friendly supplies and effective recycling program. The administration of the Institute believes that everyone has to work out the time bound strategies to implement green campus initiatives. These strategies need to be incorporated into the institutional planning and budgeting processes with the aim of developing a clean and green campus. Every individual of Campus will work, may he/she be a student, faculty and support staff to foster a culture of self-sustainability and make the entire campus environmentally friendly. The Green Campus Initiatives (GCI) will enable the institution to develop the campus as a living laboratory for innovation.

1. Seek views of all the Stakeholders to make the Go Green Campus initiative functional throughout the year.
2. Conduct the Campus' environmental impacts to identify the targets for improvements.
3. Establish a Green Campus Environmental Ethic Awareness campaigns.
4. Set forth a Green Campus Mission and a Statement of Principles.
5. Link Green-Campus activities to Academics in the Institute.
6. Organize Awareness Programs for the students, faculty and society.
7. Develop a strategic plan and create student teams to carry out specific tasks of the strategic plan. For instance, a plan to save energy at the institute level with time bound plan to install Solar Power Station mandatorily either at the top of Institute building or in open field. This will enable the institute to have 24x7 power supply.
8. Phase out the CFL and conventional light source such as bulbs and tube lights, halogen and mercury street/campus lights and get them replaced by the LEDs.
9. Conduct an Annual Green, Environment and Energy Audit.

10. Purchase only Energy Efficient Computers viz: “ENERGY STAR” or any other equivalent.
11. Establish public/private partnerships with personnel from state and local environmental agencies, utilities, and the business community.
12. Evaluate operations in terms of pollution prevention, waste stream management, and energy efficiency reducing, reusing, recycling, and repairing wherever possible.
13. Secure a commitment up front from the people in charge that well-founded recommendations will be acted upon once audits are completed.

### **Promotion of “Save Energy Tips” in and outside the Institute:**

1. Activate power management features on your computer and monitor so that it will go into low power “sleep” mode when you are not working on it.
2. Turn off your monitor when you leave your Table.
3. Activate power management features on your laser printer.
4. Whenever possible, shut down rather than logging off.
5. Turn off unnecessary lights and use daylight instead.
6. Avoid the use of decorative lighting.
7. Use LED or compact fluorescent bulbs.
8. Keep lights off in conference rooms, classrooms, lecture halls when they are not in use.
9. Use the fans only when they are needed.
10. Unplug appliances not plugged into power strips (like TVs, Refrigerators, ACs, tea/coffee pots, printers, faxes, and chargers etc.)

### ***Water conservation:***

#### **Water Treatment Plant**

Along with the water supply of Local Body Management (Municipal Corporation), we have installed a water treatment plant to treat the well-water and installed Hydro-pneumatic system for upliftment and circulation of said treated water to various overhead tanks.

#### **Recharge Pit**

Alongwith the use of water supply of Local Body Management (Municipal Corporation), and well-water, we have a Recharge Pit which allows th rainwater to replenish the groundwater by recharging the underground aquifers. The purpose for building siad recharge pit is to recharge a borewell or just to help the water infiltration in our campus.

### **Major Green Campus Initiatives:**

- Installation of Solar Power Station
- Waste water Management/ Rainwater harvesting
- Development of Sewage Water Treatment Plant
- Sensor based energy conservation
- Displayed poster on E-waste Management
- Maintenance of water bodies and distribution system in the campus
- MIS to make paperless administration
- Making efforts for Plastic free Campus
- Tree Plantation Drive
- Cleanliness Drive
